**THE PLUS 90t™
MODEL 352MAV
WITH PERFECT HEAT**

Two Heating Stages for Improved Comfort & Savings.

Enjoy the Comfort

Bryant has been America's trusted source for high-quality, money-saving comfort since 1904. That tradition continues with the Plus 90t with Perfect Heat. The Plus 90t combines our proven, high-efficiency condensing furnace design with the added comfort and economy of Perfect Heat to create a furnace you can get extra comfortable with. Designed, built and backed by Bryant, and installed by your trusted Bryant dealer, the Plus 90t is your answer for warm, economical winter heating.

WARRANTY

Bryant is confident in the quality of the Plus 90t and backs it with written warranty protection. The heat exchangers are covered with a lifetime limited warranty. The entire unit is protected by a five-year limited warranty. Ask your Bryant dealer for details on our extended warranty program.

Heating & Cooling Systems
Since 1904

Heating Comfort and Savings Unmatched by Standard Furnaces.

Bryant's Plus 90t proves, once and for all, that all furnaces are not created equally. To make your home more comfortable, Perfect Heat technology combines two heating stages with an intelligent furnace control that selects the best heating stage for both comfort and economy. The low heating stage provides the most comfort and savings by gently circulating heated air at a smooth, consistent level. When additional warmth is needed at start-up, or to enhance your comfort during extreme winter conditions, the higher heating stage is used.

This furnace uses two heat exchangers to conserve energy at a remarkable, 93% AFUE (Annual Fuel Utilization Efficiency) efficiency rating. The main heat exchanger features an s-shaped design that transfers 80% of available heat into your home,

the maximum performance for most standard furnaces. Bryant's secondary heat exchanger transfers an additional 13% of usable heat to help make a difference you can see on your utility bill.

Breathe a Little Easier With Improved Air Quality.

One of the many comfort features of the Plus 90t is the improved air quality it can provide. Because its low-stage heating cycles last about 40% longer than standard models, this furnace circulates air more frequently. As a result, indoor air passes through your system's filter for longer stretches of time, leaving the air you breathe cleaner. And, when you add a higher efficiency Bryant air filter to your air cleaner cabinet, your system will do an even better job of cleaning the air.

Part of Perfect Heat™

Home Comfort Components.

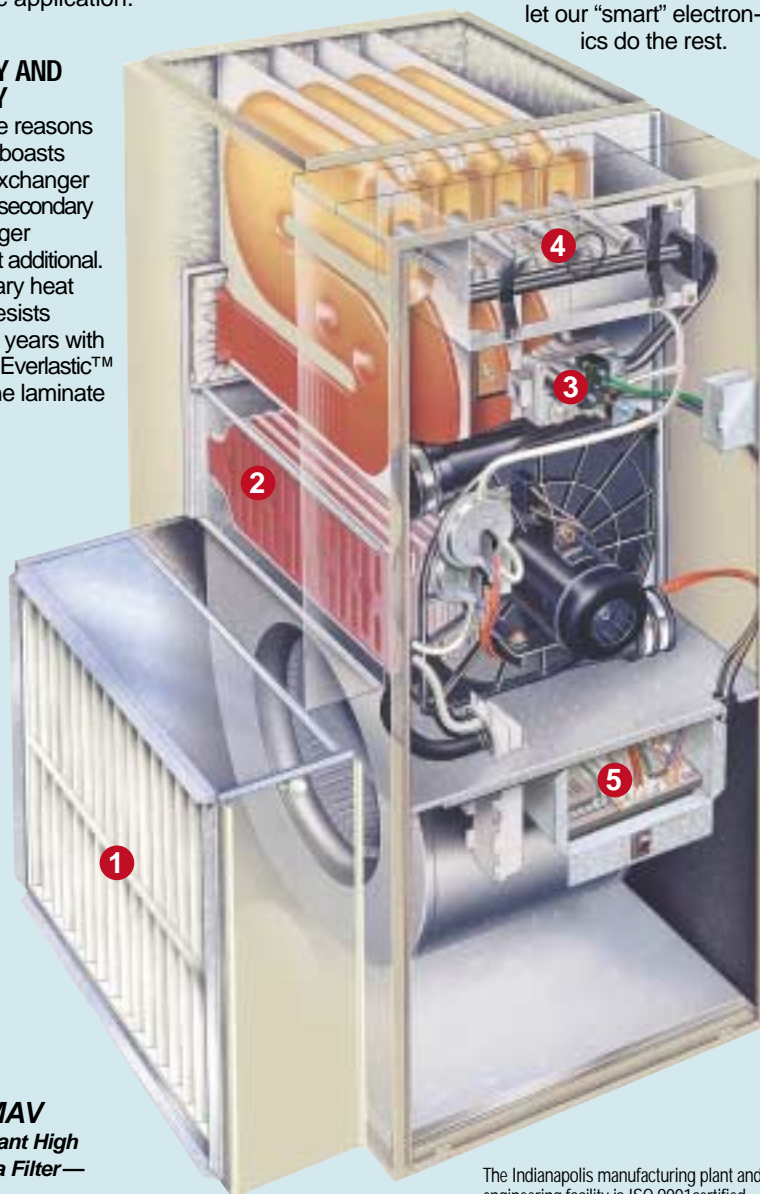

1 IMPROVED INDOOR AIR QUALITY
is made easier with our air cleaner cabinet accessory. When installed as a part of your system, this cabinet allows for easy and convenient addition of a Bryant high-efficiency air filter. Ask your Bryant dealer if the air cleaner cabinet will work with your specific application.

2 LASTING DURABILITY AND EFFICIENCY
are two of the reasons the Plus 90t boasts a two heat exchanger system. The secondary heat exchanger squeezes out additional. The secondary heat exchanger resists corrosion for years with our patented Everlastic™ polypropylene laminate coating.

3 TWO STAGES OF HEATING
provided by our two-stage gas valve. Low stage heating is used up to 90% of the time for smooth, consistent comfort. High stage heating provides an extra boost at start-up and during extreme winter conditions.

4 DRAFT-FREE OPERATION
and reduced cold air infiltration are two reasons why the Plus 90t operates with a sealed combustion system.

5 SMART OPERATION
with our patented furnace control board means your family will always enjoy the best combination of comfort and economy. Just set the thermostat and let our "smart" electronics do the rest.

Bryant Durability.

All of this advanced comfort technology isn't worth two cents if it doesn't work. That's why we think it's important to know that the components and systems in the Plus 90t offer a proven history of reliability in homes just like yours. And, with reliability testing starting with product design and continuing through final assembly, you can be sure that every furnace we make is created with your satisfaction in mind. Enhanced comfort, money-saving efficiency, and Bryant reliability all combine to make the Plus 90t the right choice for your family's heating needs.

Bryant offers a complete line of easy-to-use thermostats that improve the efficiency and reliability of your indoor comfort system. Ask your local Bryant dealer how to improve the value of your heating and cooling system with one of our thermostats.

A Comforting Tradition Since 1904.

Bryant has been putting American homeowners at comfort for years. Our tradition of offering high-quality home comfort products is the result of teamwork throughout our organization. From the engineers in our design laboratories to your trusted local dealer, Bryant offers expertise, skilled craftsmanship and genuine concern for your comfort that is reflected in the products we offer.

The Plus 90t with Perfect Heat™ is the perfect start to an exceptional home comfort system that can also include a Bryant air conditioner, air cleaner, humidifier, ventilator, zoning and system control. All of these products are available with the help of your local Bryant dealer. Your local dealer is the key, offering expert analysis, advice, and recommendations on the Bryant system that best fits your home, your budget and your comfort needs.
