Bryant's Plus 90i Provides The Best Comfort.

Since the earliest days of this century, Bryant has offered solutions for indoor comfort. Through the years, our ability to produce products that provide long-lasting, energy-efficient operation and top-quality performance has made Bryant a leader. Today, Bryant continues to lead the home comfort industry by offering soothing comfort to homeowners everywhere with the Plus 90i condensing gas furnace.

Bryant's Plus 90i Will Never Leave You Out In The Cold.

When Old Man Winter comes knocking on your door, you need a furnace you can count on. With Bryant's Plus 90i, you can protect your family from the harsh winter cold without stretching your budget too thin. The Plus 90i keeps your home warm and comfortable with up to 96.6% AFUE (Annual Fuel Utilization Efficiency). That's over 30% more efficient than typical older furnaces.

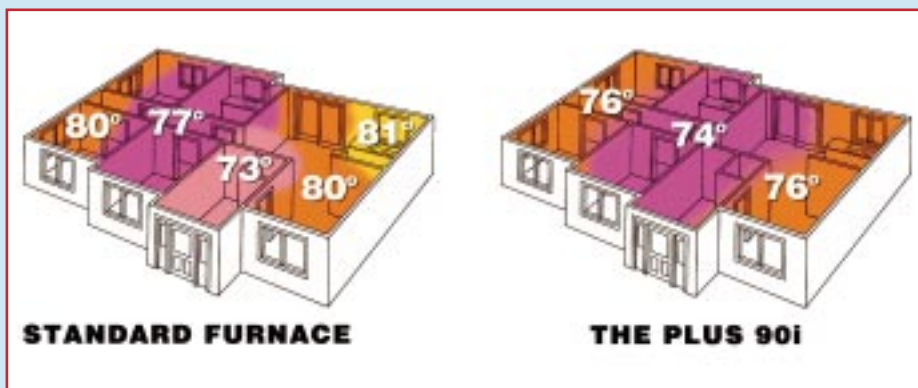

The Plus 90i operates at the ideal capacity to efficiently warm your home. For example, on typical days the Plus 90i operates at a lower capacity to maintain your desired comfort level. In more extreme temperatures, the Plus 90i automatically stages up into a higher capacity to ensure your comfort.

Additional Savings.

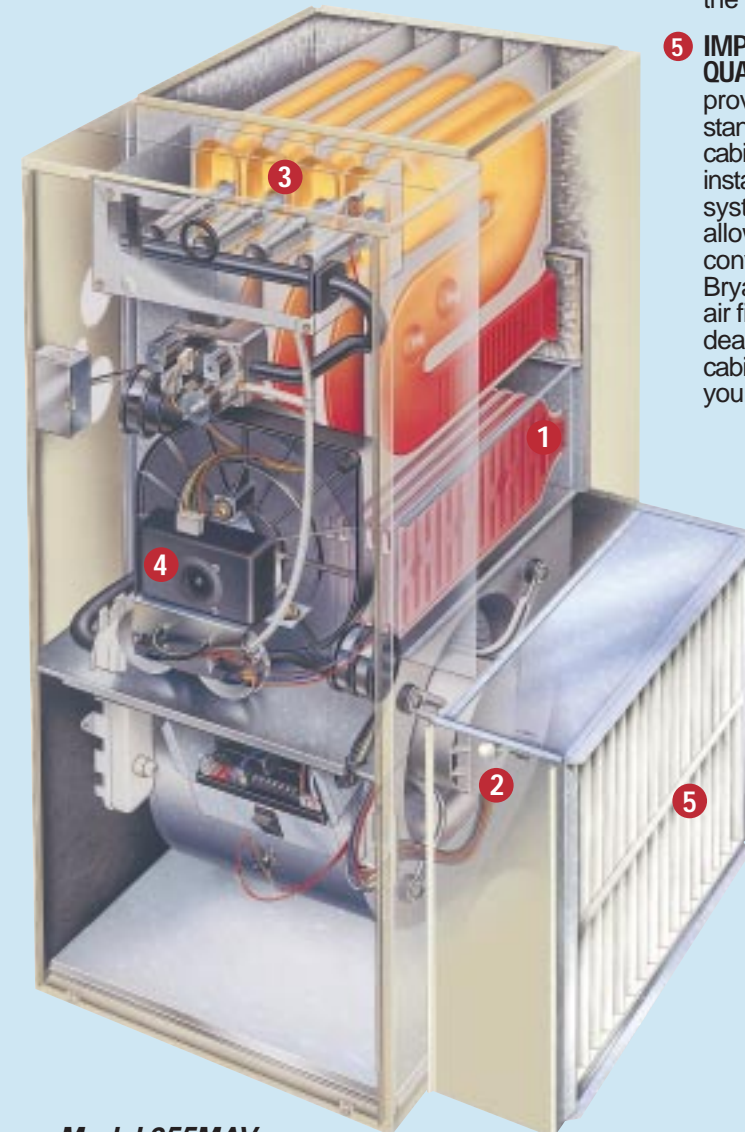

The Plus 90i will also save you money on your electric bills, thanks to the highly efficient variable-speed motors. This combination of gas and electric savings makes the Plus 90i one of the most energy-efficient furnaces you can buy.

The Plus 90i variable speed eliminates stagnant pockets of air, keeping temperatures consistent from room to room.

Comfort Components For Long-lasting Durability.

- SECONDARY CONDENSING HEAT EXCHANGER**
Extends heat transfer for higher efficiency. It is protected by our patented Everlastic™ coating for long-lasting durability. This component is backed by our lifetime limited warranty.
- VARIABLE-SPEED BLOWER**
Features a direct-drive motor that operates with precision to deliver quiet, dependable heating.
- DIRECT VENT SYSTEM**
Eliminates drafts and allows quiet operation by using outdoor air for combustion.
- VARIABLE-SPEED INDUCER MOTOR**
Quietly draws air from outside and runs at the exact speed needed for the highest efficiency.
- IMPROVED INDOOR AIR QUALITY** is the benefit provided with our standard air cleaner cabinet accessory. When installed as a part of your system, this cabinet allows for easy and convenient addition of a Bryant high-efficiency air filter. Ask your Bryant dealer if the air cleaner cabinet will work with your specific application.

Model 355MAV shown with Bryant High Efficiency Media Filter—sold separately.

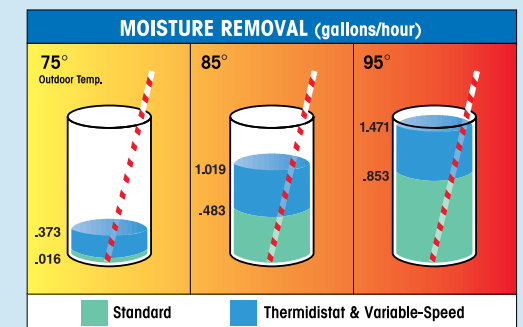

The Indianapolis manufacturing plant and engineering facility is ISO 9001 certified.

Designed For Comfort.

The Plus 90i will improve your comfort and save you money all year round. In the winter, the Plus 90i keeps the temperature much closer to your desired setting. It does this by running in low heat mode up to 90% of the time. With nearly continuous, low speed air circulation, the Plus 90i saves money while keeping temperatures consistent throughout the house. During the summer months, the Plus 90i saves you money by enhancing the efficiency of a Bryant air conditioning system and improves comfort by removing more moisture when combined with a Bryant Thermidistat™ Control.

Bryant offers a complete line of easy-to-use thermostats that improve the efficiency and reliability of your indoor comfort system. Ask your local Bryant dealer how to improve the value of your heating and cooling system with one of our thermostats.

As the summer heats up, the Plus 90i removes more moisture from your indoor air to improve your comfort.
