VENTILATOR PLUS™
ENERGY RECOVERY
VENTILATORS

Fresh Air For Longer Cooling Seasons.

Bryant Ventilators Provide

For nearly one hundred years, Bryant has been your trusted friend in the home comfort business.

Generations of homeowners just like you have turned to us for reliable, energy-efficient heating, cooling and indoor air quality products.

Your local dealer will sit down with you and learn about your indoor comfort needs. Then, he will recommend and install the Bryant products that make the most sense for you and your family. As a part of your system, your Bryant dealer may recommend the fresh, clean indoor air and energy recovery efficiency provided by a Bryant Ventilator Plus™ energy recover ventilator (ERV).

WARRANTY

Bryant guarantees your comfort with written warranties. Our Ventilator Plus energy recovery ventilators are protected by a parts only five-year limited warranty and a one-year limited warranty on the high-efficiency core. Extended warranties are also available. Ask your trusted Bryant dealer for details.

Enjoy Clean, Fresh Air And High-Efficiency Energy Recovery With Bryant's ERV.

Today's new construction homes are sealed tightly for extra energy efficiency. That means your home is a haven for recirculated germs, stale air and humidity. Bryant's Ventilator Plus energy recovery ventilator brings the freshness of outdoor air inside without sacrificing the comfort and efficiency you expect for your family.

FEATURES

- The Ventilator Plus ERV brings fresh outdoor air inside through the fresh air port.
- The high-efficiency core recovers energy from indoor air and transfers the heated or cooled air temperature to the fresh incoming air without mixing the airstreams.
- The high-efficiency core of the Ventilator Plus ERV removes humidity from the in-coming outdoor air during summertime operation.
- Strategic positioning of the motor makes the Ventilator Plus ERV one of the quietest units available today.
- Two briefcase-style latches on the door of the unit make filter maintenance quick and simple.

BENEFITS

- Improves the air your family breathes by exchanging stale indoor air with fresh outdoor air.
- Adds comfort through improved humidity control in the summertime.
- Enhances indoor air quality by never mixing incoming and outgoing airstreams.
- Quiet operation ensures that you can relax in comfort.
- Easy accessibility makes cleaning the filters and the core simple.

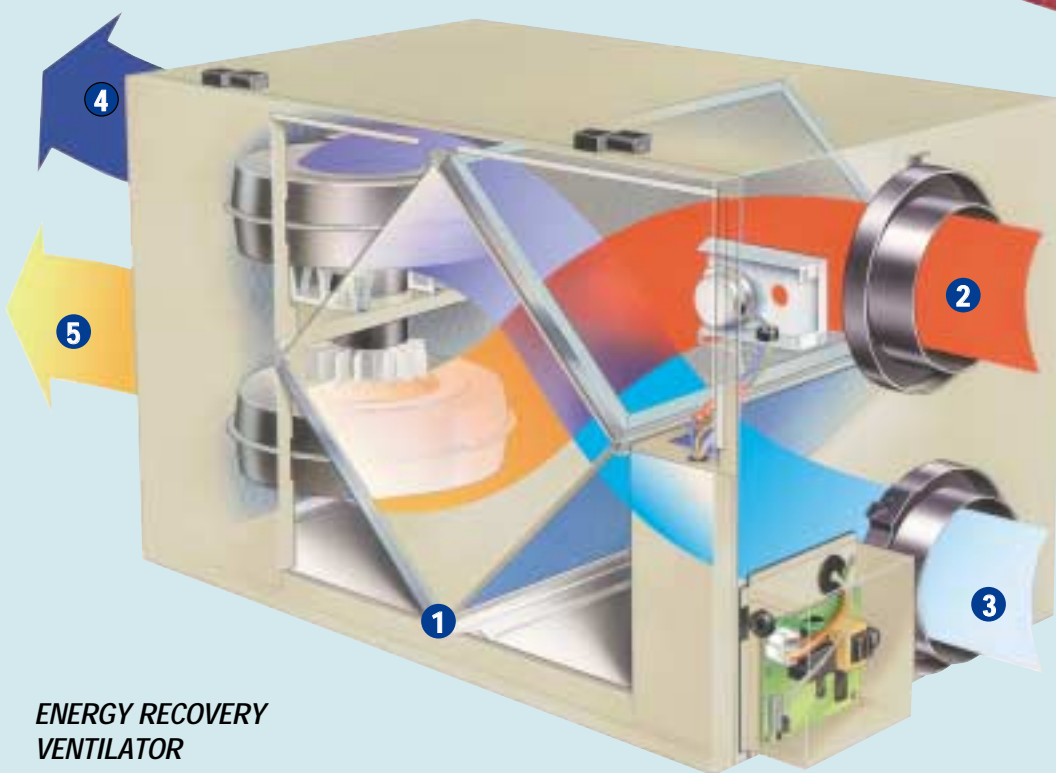

le A Breath Of Fresh Air.

Trusted Components.

- 1 HIGH-EFFICIENCY CORE**
Transfers the heated or cooled indoor air temperature to the fresh incoming air without mixing the airstreams. Our high-efficiency core also removes humidity from outdoor air before it is distributed throughout your home.
- 2 FRESH AIR PORT**
Brings fresh, outside air into the unit. The fresh air filter removes large particles of dust and dirt from incoming fresh air.
- 3 STALE AIR PORT**
Connects to the return air duct system in your home to draw stale, indoor air into the ventilator core.
- 4 EXHAUST PORT**
Removes the stale air from your home after the energy transfer has taken place in the high-efficiency core and exhaust it outside.
- 5 SUPPLY PORT**
Delivers fresh, conditioned air back into your home comfort system.

Enjoy The Comfort Of Humidity Control.

Designed for humid climates and areas with longer cooling seasons, the Ventilator Plus energy recovery ventilator helps reduce incoming humidity by pulling the moisture out of the fresh, outdoor air before it is distributed throughout your home. In some cases, the ERV can also be installed to exhaust humidity from specific areas of your home, such as bathrooms, kitchens and laundry rooms. A vital addition to your home comfort system, the Ventilator Plus perfectly complements Bryant's complete line of heating, cooling, zoning, controls and indoor air quality products.

VENTILATOR

Convenient Control And Easy Access.

Whole-home ventilation couldn't be easier with Bryant's Ventilator Plus™ ventilators. Just set the easy-to-use wall control and let the system take care of the rest.

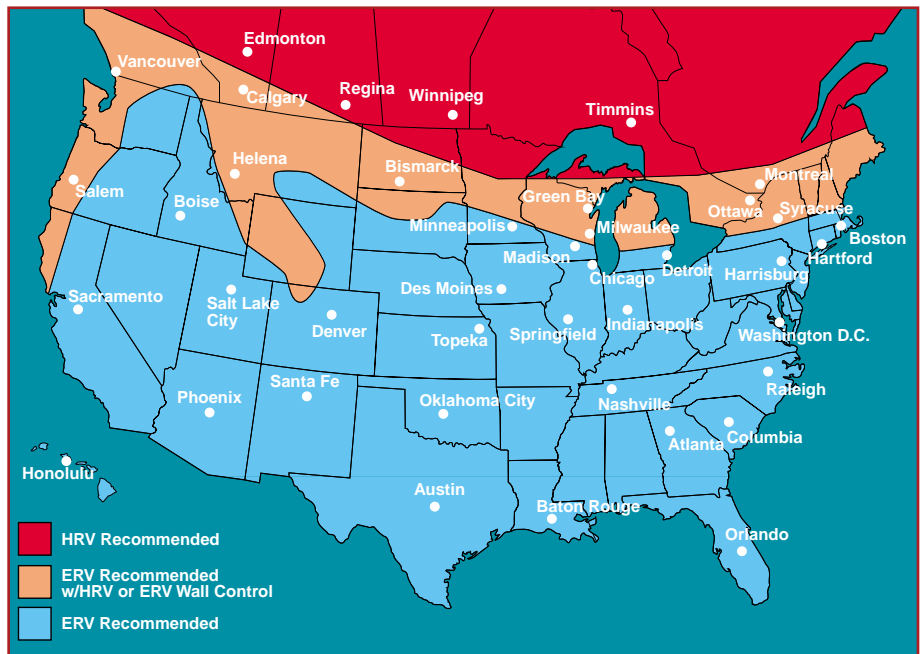

To help maintain the best performance, the Ventilator Plus is designed for easy maintenance. The filters and the high-efficiency core can be removed and cleaned without using tools. Your trusted dealer can recommend the Ventilator Plus that's right for you. He will build and maintain your system so it operates at peak performance for money-saving efficiency and quiet, soothing comfort. Ask your trusted Bryant dealer for more details about simple, worry-free comfort with Bryant's Ventilator Plus energy recovery ventilators.

WALL CONTROL UNIT

Approved in R-2000 homes when installed according to R-2000 standards.

HRV or ERV? If you live in a colder climate with a longer heating season, your dealer will likely recommend the HRV. For warm, humid regions with longer cooling seasons, the ERV is preferred. Your local Bryant dealer can determine which is best for you.
