

Easy-To-See™ thermostats keep you in control of your comfort

Comfort made easy

Honeywell's Easy-To-See thermostats are specially designed for anyone with decreased vision, blindness, or limited hand strength. They keep you in control of your comfort by making it easier to adjust your thermostat.

High-contrast markings and a low-glare design make it easier to see the current temperature setting. The temperature setting scale and switch markings are raised, for easy recognition by sight or by touch.

Temperature adjustments are easier thanks to a large, grippable temperature-

setting dial or lever, and click-detents that provide audible and tactile feedback for every two degrees of movement.

The large-print owner's guide is easy to read. There's even an optional Braille owner's guide available (for a free copy call Honeywell at **1-800-345-6770, ext. 7175.**)

Easy-To-See thermostats are available for low voltage conventional or heat pump systems.

T87F Easy-To-See™ Round® Thermostat

Large-print decals and enlarged switch markings make it easier to select your settings.

Enlarged, raised numerals at 50, 60, 70 and 80 °F marks are easy to recognize by sight or by touch.

Grippable, ribbed temperature dial makes setting the desired temperature easier. A click is heard, and indent felt, for every two degrees of movement.

Easy-To-Use™ Accessory

A snap-on Easy-To-Use Accessory (available for all Easy-To-See Round® Thermostats) aids those with limited hand or wrist strength due to arthritis, multiple sclerosis, polio, spinal cord injuries, or other causes. It doubles the grippable area of the temperature adjustment dial, allowing users to easily brush or roll the dial to the desired temperature setting.

MODEL	COLOR	REMARKS
T87F3467	Gold	For heating, cooling or heating/cooling.
T87F5199	Premier White	For heating, cooling or heating/cooling.
TS86A1421	Gold	For 250/500 or 750 millivolt gas systems.
221886A	Clear	Easy-to-Use accessory snaps onto the temperature dial.
T841A1696	Taupe	Heat pumps with manual heat/cool changeover.

Your heating and cooling contractor will help you select the appropriate model for your equipment.
