

ZONE PERFECT PLUS™

**Up To
EIGHT-ZONE**

Creating Better Comfort Throughout Your Home.

Bryant Improves Comfort And Energy Efficiency With Zoning.

If you are like most people, you realize that some areas of your home or office are more comfortable than others. The size of your rooms, the floor plan and many other factors contribute to the varying temperatures. The best way to overcome all of these obstacles and maintain even, room-to-room comfort is to have separate control over the different areas of your home. That's what you get with Bryant's Zone Perfect Plus™ Eight-Zone.

Properly installed by your local Bryant dealer, this system divides your dwelling in up to eight zones. This eliminates the needless waste of heating or cooling unused zones. And, with Smart Recovery and humidity control, Bryant's Zone Perfect Plus™ Eight-Zone provides all-around comfort, all year long.

WARRANTY

Bryant's Zone Perfect Plus Eight-Zone is backed by a one-year limited warranty. Ask your Bryant dealer about extended warranty programs.

Zoning Helps Overcome All Of Your Comfort Challenges.

Challenges:

- One of the biggest obstacles to overcome is using a single thermostat to maintain comfort throughout all of your living areas. That individual thermostat can't possibly keep track of temperatures throughout the entire home. And, because hot air rises and cool air falls, it's even worse when you have a second story.
- High ceilings, two-level entrances, large windows, skylights and fireplaces all affect your indoor comfort.
- Heat from the sun or shade from a large tree can greatly affect indoor comfort. Those effects shift as the sun moves throughout the day.

Zoning Solutions:

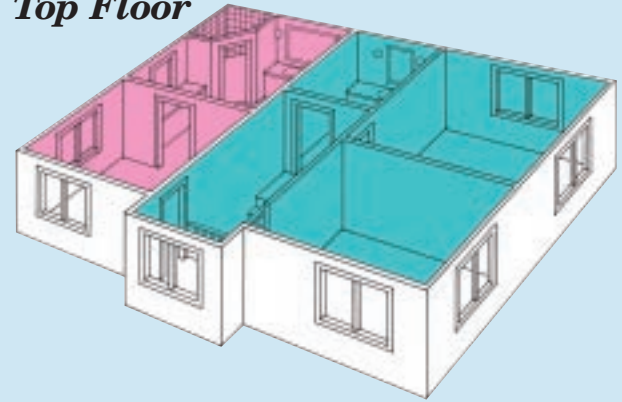

- The first and most obvious solution to comfort problems on multiple levels is to make each floor a zone. Then, split each floor into separate zones according to use or special comfort needs.
- On the main floor, the kitchen and dining areas together make up a logical zone. Living areas on the same floor, such as a family room, a formal living room or a great room could be included in a separate zone. Other areas such as a rarely used study, a master bedroom/bathroom or a large entry might need to be zoned separately as well.
- On the upper level, you might consider separating the children's bedrooms from the master bedroom/bathroom area. Or, an unoccupied guest bedroom could be zoned by itself.
- If you have a basement, consider making it a separate zone for extra comfort.

Other Benefits Of Bryant Zoning.

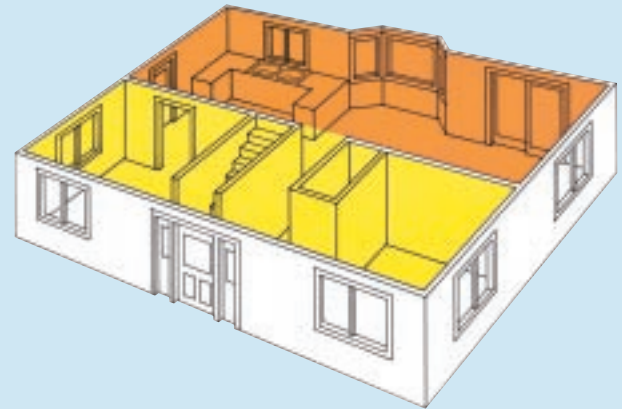

Smart recovery starts the system in advance to be sure that each zone reaches your selected temperature setting at the scheduled time. For added comfort during hot, sticky summers, this system can be set to dehumidify. And, when installed with a Bryant humidifier, Zone Perfect Plus Eight-Zone can provide relief from dry, heated winter air.

For all the details on how Zone Perfect Plus Eight-Zone can enhance the effectiveness and energy efficiency of your home comfort system, talk to your local Bryant dealer today.
